PRECAUTIONS

Use only in a 12-volt DC negative-ground electrical system.

Be sure to connect the color coded leads according to the diagram.

Incorrect connections may cause the unit to malfunction or damage the vehicles, electrical system.

Be sure to connect the speaker (-) leads to the speaker (-) terminal.

Never connect the left and right channel speaker cables each other or to the vehicle body.

Make sure all the connections are completely correct before turning on your unit.

Using a fuse with a higher amperage rating may cause serious damage to the unit.

DO NOT attempt to disassemble the unit.

Laser beams from the optical pick up are dangerous to the eyes.

Do NOT block vents or radiator panels. Doing so may cause heat to build up inside and may result in fire.

Make sure those pins or other foreign objects do not get inside the unit; they may cause malfunctions, or create safety hazards such as electrical shock or laser beam exposure.

Keep the volume at a level at which you can hear outside warning sounds (horns sirens, etc.).

Stop the vehicle before carrying out any operation that could interfere with your driving.

Do NOT work in extremely high or low temperature.

Be sure the temperature inside the vehicle is between +60°C and -10°C before turning on your unit.

| The operation keys do not work. | The built-in micro compute is not operated properly due to noise. | Press the RESET button. Front panel is not properly fixed into its place. Contacts between front and main unit are dirty. Clean contacts with a cotton bud soaked in isopropyl alcohol. |
| The radio does not receive the radio station automatic selection does not work. | The antenna cable is not work or connected. | Insert the antenna cable firmly. |
| | The Signals are too weak. | Select a station manually. |

MAINTENANCE

1. Keep the product dry. If it does get wet, wipe it dry immediately. Liquids might contain minerals that can corrode the electronic circuits.

2. Keep the product away from dust and dirt, which can cause premature wear of part.

3. Handle the product gently and carefully dropping it can damage circuit boards and cases, and can cause the product to work improperly.

4. Wipe the product with a dampened cloth occasionally to keep it looking new. Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the product.

5. Use and store the product only in normal temperature environment.

High temperature can shorten the life of electronic devices and distort or melt plastic parts.
